Education

- **FULL STACK DEVELOPMENT** | CodeYourFuture | Birmingham | April 2022 - March 2023
  - 11-month program of Software Development using PERN Stack (PostgreSQL, Express.js, React and Node.js) and vanilla JavaScript, HTML and CSS.
- **BACHELOR'S DEGREE IN ELECTRONICS ENGINEERING** | Coventry University | Coventry | September 2016 - May 2020
- **BTEC ENGINEERING EXTENDED DIPLOMA** | Sandwell College | Birmingham | September 2013 - May 2016

Technical Skills

- **Languages:** Javascript, HTML, CSS, C#.
- **Frameworks and Libraries**: Node.js, Express.js, React.js, Redux and database frameworks (PostgreSQL and MongoDB).
- **Tools:** Git, SQL, Docker and Linux.
- **Testing:** Cypress and JEST.

Employment

May 2023 – Present   **FULL-STACK DEVELOPER**, CodeYourFuture

- Developing and maintaining 4 software products: Dashboard (CRM), CYF Forms (Registration), Intro To Digital - ITD (Application Process), CYF API (Integration).
- Collaborating through pair programming, reviewing, testing, and implementing solutions.
- Refining and implementing user stories, ensuring adherence to requirements and quality standards across sprints.

Dec 2022 – April 2023   **QUALITY CONTROL SUPERVISOR**, Trigo Group

- Reduced communication delays by 50% through protocol improvements.
- Created and updated work instructions, which led to efficient and prompt job execution.
- Enhanced employee performance by offering support and development sessions.

Oct 2019 – April 2022   **TEAM SUPERVISOR**, Fenous Grill
- Managed staff schedules, and optimised order communication channels, reducing processing time by 20% and boosting customer satisfaction reviews by 15%.

Projects

SAMA E-Commerce website   **https://the-shop-omw9.onrender.com/**

- The website features a clear homescreen displaying products, secure checkout with an integrated cart, PayPal, and credit/debit options. It includes user profiles, admin functionalities for order management, and a product reviews/rating system for customer feedback.
- Built with MERN stack to ensure a seamless user experience with a dynamic front-end and robust back-end. Redux enhances performance, while MongoDB offers adaptable, scalable storage for evolving user needs.

STUDY BUDDIES Website   **https://starter-kit-0qci.onrender.com/**

- Developed a website connecting 90% of CodeYourFuture students based on availability.
- Implemented a fully functional React Front-end (HTML, CSS, JavaScript) and created the Back-End with Node.js and Express. Constructed API endpoints and SQL tables for seamless integration.
- Collaborated on weekly sprints and daily standups for testing, implementation, and integration.
